

# Upgrade Your Cable Certification Game and **Get 80% Off\***

Gold customers can trade up to Versiv 2 for a limited time.

Versiv 2 supports all the modules, accessories, and software you're using with your current mainframes, while speeding the test experience and lowering cost of ownership.

- Versiv 2 offers built-in wireless — no more unplugging the Wi-Fi adapter to inspect a fiber
- Increased memory
- Faster processor for:
  - Faster test times
  - Faster results transfer to your PC
  - Faster software update times
- Test longer with a new battery.
- Guaranteed compatibility with Versiv firmware 7.0
- Say goodbye to the dirty fingerprints, scratches, and dents from years of hard use.

See the other side for instructions for taking advantage of this limited time offer.

(Note: Gold does not cover upgrades for compatibility with firmware releases above 6.14. Gold customers wishing to use firmware 7.0 or above will need to purchase an upgrade and Fluke will transfer any remaining Gold on returned units to the new units.)

## Eligible models:

### VERSIV2-M

VERSIV2 main replacement with Wi-Fi

### VERSIV2-M INTL

Learn more by contacting one of our experts: <https://forms.fluke.com/Versiv2Bundle80>

\*As compared to list prices for models VERSIV2-M and VERSIV2-RU purchased separately. Offer good in US and Canada only. Orders must be placed by January 30, 2026.

# How to Take Advantage of This Trade in Offer.

1. Check to make sure your Versiv tester (DSX, CertiFiber, OptiFiber, or FI-7000 is eligible for trade-in by looking in the upper right corner of the mainframe and remote.

2. Ensure you have an active Gold support agreement for the main, remote, and modules associated with the unit(s) you want to trade-in. Check your account at [my.fluke.com](https://my.fluke.com) or drop a note with your serial numbers to our team at: [insidesales.ig@fluke.com](mailto:insidesales.ig@fluke.com).
3. If you don't have Gold support, you can purchase it for your complete tester on the same purchase order. Gold support must cover main, remote and modules (GLD3-V2 M/RU KIT and GLD-V2 M/RU KIT are not eligible). If you aren't sure, check with your local reseller or call us at 1-800-283-5853.
4. Contact your authorized Fluke reseller and purchase the appropriate model (see front page).
  - a. Provide the serial numbers of the main and remote you're planning to trade on your purchase order.
  - b. Quantity of items returned must match quantity of items purchased (e.g.: One main + remote for each main + remote purchased).
  - c. Purchase order must include only the trade-in models and Gold support (if necessary).
  - d. Orders must be placed before the end of the promotional period.
5. You'll receive a Return Material Authorization (RMA) number from Fluke. You'll need that to return your trade-in units.
6. When your upgrade kit arrives, remove the measurement modules from your Versiv main (and remote, if applicable). Keep these and any accessories.
7. Ship the main (and remote, if necessary) back to Fluke with the RMA number. Make sure the serial numbers match those on the RMA you received. These must be returned within 30 days.
8. Inform the Gold team (1-800-283-5853) about the new serial numbers so they can transfer the support to the new models.
9. Install the measurement modules in your new main (and remote, if applicable) and start testing!

Serial numbers of main and remote can be found on the back, under the module.

Return only the mainframe and remote (circled). Keep all your modules and accessories.
